1976 ARTICLE INDEX

A subject listing of articles published in MODERN MACHINE SHOP during the past year.

ADHESIVES, FASTENING
Seal It, Bond It, Lock It, Retain It - With Adhesives — Dec. 74
Fastener Standardization Doesn't Work Here — Dec. 98

ALLOYS
What You Should Know About Wear Resistance — Mar. 74

BORING
No Routine Part Runoff — Feb. 94
Twin Approach Solves Twin-Engine Tooling Problem — Apr. 94
Boring Interrupted Cuts - With Precision — Oct. 89
MDI Beats Handwheels By 30 Percent — Oct. 94
Non-NC Should Be Programmed Too — Oct. 102
Productivity Plus With Machining Center Using Heavy-Duty Boring Tools — Nov. 122

BROACHING
Fast Change-Over Keys Short-Run Broaching — May 118

BURNISHING & POLISHING
Nontraditional Machining: Where Does It Stand? - Pt. 1 of a 4 Pt. Series — Apr. 84

CARBIDE TOOLING
Shearing With Carbide: Where Does It Stand? — Jan. 66
Twin Approach Solves Twin-Engine Tooling Problem — Apr. 94
New Tooling System Shaves NC Turning Downtime — July 105
Carbide Does More Than Increase Speeds On Automatic Screw Machines — Sept. 114
Boring Interrupted Cuts - With Precision — Oct. 89
Interrupted Cuts With Carbide — Oct. 99
Non-NC Should Be Programmed Too — Oct. 102
We Don't Machine Fast Enough — Dec. 102

CERAMIC TOOLING
We Don't Machine Fast Enough — Dec. 102

CLAMPING & HOLDING
Switch In Collet Chuck Size Improves Accuracy — Feb. 96
Positive Lock For Spring-Loaded Clamp — Feb. 99
Adjustable Cam Locator Needs No Locking — May 129
Large Chuck Solves Difficult Workholding Problem — Sept. 130
One Clamp Applies Pressure Two Ways — Sept. 133
Seal It, Bond It, Lock It, Retain It - With Adhesives — Dec. 74
The Quick-Jaw-Change Chuck...A New Way To Cut NC Downtime — Dec. 94
Holding Fixtures Made In-House — Dec. 115

CUTTING FLUIDS
Ionic Coolant Doubles Drilling Production — Mar. 103
Reclaimer Salvages Run-In Oil — Apr. 120
Drill Selection, Care And Use — Nov. 88
Tramp Oil Removal — Dec. 113

DEBURRING
Nontraditional Machining: Where Does It Stand? - Pt. 1 of a 4 Pt. Series — Apr. 84
Nontraditional Machining: Where Does It Stand? - Pt. 2 of a 4 Pt. Series — May 103

DRAWING & FORMING
Swaging: New Opportunities From A Traditional Process ____ Apr. 98
Cold Metal Shaping ____ Apr. 106
Valve Stems Switched To Cold Heading ____ Apr. 122
Cold Drawn Rod Cuts Cost ____ May 121
Take Another Look At Tube Specifications ____ Sept. 102

DRILLING
Machining Center Designed For Wide Market Application ____ Jan. 88
No Routine Part Runoff ____ Feb. 94
Ionic Coolant Doubles Drilling Production ____ Mar. 103
Overlength Drills Solve Woodpeckering Problem ____ Apr. 123
The Real Advantages Of Automatic Tool Changing ____ June 90
Non-NC Should Be Programmed Too ____ Oct. 102
Toolmaker's Transfer Principle Used In Small Lot Production ____ Oct. 123
Drill Selection, Care And Use ____ Nov. 88
The Proof Is In The Practice ____ Nov. 108

ELECTRICAL DISCHARGE MACHINING
Precision Grinding Improves Fuel Injectors ____ Feb. 60
Traveling-Wire EDM Carves Solid Punches And Dies That Match ____ Feb. 66
How The Users Look At EDM - Pt. 1 of a 2 Pt. Series ____ Feb. 86
How The Users Look At EDM - Pt. 2 of a 2 Pt. Series ____ Mar. 87
EDM Produces Type Slugs Economically ____ Mar. 104
Nontraditional Machining: Where Does It Stand? - Pt. 4 of a 4 Pt. Series ____ July 79
TW/EDM Eliminates Split Dies ____ Sept. 120

ELECTROCHEMICAL GRINDING
Nontraditional Machining: Where Does It Stand? - Pt. 2 of a 4 Pt. Series ____ May 103
Nontraditional Machining: Where Does It Stand? - Pt. 4 of a 4 Pt. Series ____ July 79

ELECTROCHEMICAL MACHINING
Nontraditional Machining: Where Does It Stand? - Pt. 2 of a 4 Pt. Series ____ May 103

EQUIPMENT DESIGN
The Real Advantages Of Automatic Tool Changing ____ June 90
Power Transmission Products Feature Modular Design ____ June 119
GE's Adjustable Speed Drive Features Increased Reliability Through Simplicity ____ June 120
MDI Beats Handwheels By 30 Percent ____ Oct. 94
NC User Sets Own Rules ____ Nov. 96

EQUIPMENT MAINTENANCE
Portable Stand Has Many Uses ____ Jan. 86
New Tape Has Many Uses ____ Feb. 98
Reclaimer Salvages Run-In Oil ____ Apr. 120
Diagnostic Service Speeds Maintenance On G & L Machine Tools ____ June 118
Repair Can Protect NC Tool Investment ____ July 92
What About Screw Machine Maintenance? ____ Sept. 110
Four Solutions To Servovalve Problems In NC Machines ____ Oct. 110
Seal It, Bond It, Lock It, Retain It - With Adhesives ____ Dec. 74

GAGING
Gaging Control Keys New Grinding System ____ Feb. 82
Simple Gage Replaces Shear Operator's Tape ____ Sept. 132

GEAR CUTTING & ROLLING
Right Combination Spells Productivity ____ May 84

GRINDING, HONING, LAPPING
Four Paths To Three-Axis NC Contour Grinding ... Jan. 60
Precision Grinding Improves Fuel Injectors ... Feb. 60
Gaging Control Keys New Grinding System ... Feb. 82
Hogging With The Wheel ... May 96
Nontraditional Machining: Where Does It Stand? - Pt. 2 of a 4 Pt. Series ... May 103
Nontraditional Machining: Where Does It Stand? - Pt. 3 of a 4 Pt. Series ... June 109
Nontraditional Machining: Where Does It Stand? - Pt. 4 of a 4 Pt. Series ... July 79
Rock-Bits Require Precision Grinding ... Sept. 136

HEAT TREATING & CHILLING
Holding Close Tolerances In Chilling Process ... Feb. 102
What You Should Know About Wear Resistance ... Mar. 74

INSPECTION & QUALITY CONTROL
Gaging Control Keys New Grinding System ... Feb. 82
Toolbox Tradition: Holding Fast ... Mar. 80
How To Select A Coordinate Measuring Machine ... May 90
Process Quality Control ... May 100
Hardness Testing System Performs 100 Percent Check ... May 123
Programmable Measuring System Generates Fast Inspection Data ... July 106

INVENTORY CONTROL
New Tape Has Many Uses ... Feb. 98
NCR Computer Series With Ability To Operate As Multiple Virtual Machines ... July 108

JIGS & FIXTURES
Positive Lock For Spring-Loaded Clamp ... Feb. 99
Kicker Pins Useful On Many Machine Tools ... Oct. 122
Toolmaker's Transfer Principle Used In Small Lot Production ... Oct. 123
Fixture Plugs ... Oct. 124
Holding Fixtures Made In-House ... Dec. 115

LASERS
Nontraditional Machining: Where Does It Stand? - Pt. 4 of a 4 Pt. Series ... July 79

LUBRICATION
Reclaimer Salvages Run-In Oil ... Apr. 120
What About Screw Machine Maintenance? ... Sept. 110
Four Solutions To Servovalve Problems In NC Machines ... Oct. 110

MATERIAL HANDLING
Right Combination Spells Productivity ... May 84
Rotary Hydraulic Actuators Now Have Cushion Stopping ... July 107
Parallelogram Grab Speeds Coil Handling ... Oct. 120

MATERIALS
Seal It, Bond It, Lock It, Retain It - With Adhesives ... Dec. 74

METAL CUTOFF
Shearing With Carbide: Where Does It Stand? ... Jan. 66
Practical Approach To NC Flame-Cutting - Pt. 1 of a 2 Pt. Series ... Mar. 68
Practical Approach To NC Flame-Cutting - Pt. 2 of a 2 Pt. Series ... Apr. 112

METALLURGY
Holding Close Tolerances In Chilling Process ... Feb. 102
What You Should Know About Wear Resistance ... Mar. 74
Take Another Look At Tube Specifications ... Sept. 102

MILLING
Finding Your Best Machining Conditions - Pt. 3 of a 3 Pt. Series ... Jan. 68
Simultaneous Double-Milling Eliminates Two Operations ... Jan. 81
Machining Center Designed For Wide Market Application ... Jan. 88
No Routine Part Runoff ... Feb. 94
Switch In Collet Chuck Size Improves Accuracy ... Feb. 96
Program-Controlled Milling Machines Increase Production ... Mar. 98
The Real Advantages Of Automatic Tool Changing ... June 90
Large Molds And Dies Produced Efficiently With Copy Milling ... Sept. 128
Indexable Carbide End Mills Cut Manganese Steel ... Sept. 131
"Control Box" Eliminates Timesharing Transmission Errors ... Oct. 116
Kicker Pins Useful On Many Machine Tools ... Oct. 122

NC MACHINES & CONTROLS
Four Paths To Three-Axis NC Contour Grinding ... Jan. 60
Finding Your Best Machining Conditions - Pt. 3 of a 3 Pt. Series ... Jan. 68
Complex Turning Gets Fast NC Treatment ... Jan. 78
Machining Center Designed For Wide Market Application ... Jan. 88
Two-Turret NC Turning Center Offers Interference-Free Machining ... Jan. 90
Traveling-Wire EDM Carves Solid Carbide Punches And Dies That Match ... Feb. 66
No Routine Part Runoff ... Feb. 94
Adaptive Control Combines With CNC ... Feb. 95
NC Machining Center Features 4 HP Spindle And Big Table ... Feb. 103
Practical Approach To NC Flame-Cutting - Pt. 1 of a 2 Pt. Series ... Mar. 68
How The Users Look At EDM - Pt. 2 of a 2 Pt. Series ... Mar. 87
Practical Approach To NC Flame-Cutting - Pt. 2 of a 2 Pt. Series ... Apr. 112
Automated Planning - Gathering Steam ... July 96
What To Expect From NC Training ... Sept. 94
TW/EDM Eliminates Split Dies ... Sept. 120
MDI Beats Handwheels By 30 Percent ... Oct. 94
Non-NC Should Be Programmed Too ... Oct. 102
Four Solutions To Servovalve Problems In NC Machines ... Oct. 110
"Control Box" Eliminates Timesharing Transmission Errors ... Oct. 116
Savings Realized With NC Punch And Plasma Arc Cutter ... Oct. 118
NC User Sets Own Rules ... Nov. 96
Mix And Match NC And Tracing ... Nov. 104
NC Multipart Setup: A Competitive Edge ... Nov. 114
Productivity Plus With Machining Center Using Heavy-Duty Boring Tools ... Nov. 122
Savings Realized With NC Precision Lathe ... Nov. 126
Building The NC Team Is A Management Job ... Dec. 86
NC Swiss-Type Automatic Saves Setup And Production Time ... Dec. 108
NC Turret Punch Press Cuts Production Time ... Dec. 110
Giant NC Vertical Machining Center For Machining Nuclear Reactor Components ... Dec. 115

NC PROGRAMMING
Machining Center Designed For Wide Market Application ... Jan. 88
Two-Turret NC Turning Center Offers Interference-Free Machining ... Jan. 90
Adaptive Control Combines With CNC ... Feb. 95
Across The Bridge In-House ... June 78
Mini Maximizes NC Programming ... June 84
Who Should Become Your NC Programmer? ... June 96
Automated Planning - Gathering Steam ... July 96
What To Expect From NC Training ... Sept. 94

NONCONVENTIONAL MACHINING
Nontraditional Machining: Where Does It Stand? - Pt. 1 of a 4 Pt. Series ... Apr. 84
Swaging: New Opportunities From A Traditional Process ... Apr. 98
Cold Metal Shaping ... Apr. 106

NONCONVENTIONAL MACHINING (CONT'D)
Practical Approach To NC Flame-Cutting - Pt. 2 of a 2 Pt. Series — Apr. 112
Nontraditional Machining: Where Does It Stand? - Pt. 2 of a 4 Pt. Series — May 103
Nontraditional Machining: Where Does It Stand? - Pt. 3 of a 4 Pt. Series — June 109
Nontraditional Machining: Where Does It Stand? - Pt. 4 of a 4 Pt. Series — July 79
The Proof Is In The Practice — Nov. 108

PLANT LAYOUT
Right Combination Spells Productivity — May 84

PLANT MANAGEMENT
Finding Your Best Machining Conditions - Pt. 3 of a 3 Pt. Series — Jan. 68
New Tape Has Many Uses — Feb. 98
Toolbox Tradition: Holding Fast — Mar. 80
Right Combination Spells Productivity — May 84
Who Should Become Your NC Programmer? — June 96
The Spirits Of '76 — July 65
Automated Planning - Gathering Steam — July 96
What To Expect From NC Training — Sept. 94
Non-NC Should Be Programmed Too — Oct. 102
"Control Box" Eliminates Timesharing Transmission Errors — Oct. 116
International Machine Tool Show 1976 — Nov. 117
British Machine Tool Exposition Reflects Twenty-First Century — Nov. 230
Building The NC Team Is A Management Job — Dec. 86
The Quick-Jaw-Change Chuck...A New Way To Cut NC Downtime — Dec. 94
We Don't Machine Fast Enough — Dec. 102

PRESSWORKING
Some Tips On Selecting A Press Brake — Jan. 52
Shearing With Carbide: Where Does It Stand? — Jan. 66
Small Rods Reduce Friction On Die Chute — Jan. 85
Constant Part Gripping Allows Higher Press Speeds — Jan. 89
Fine-Blanking's Functional Edge — Feb. 74
Temporary Shields For Die Pins And Bushings — Feb. 100
Weldment Over Casting For 25-Ton Flywheel — Mar. 84
Swaging: New Opportunities From A Traditional Process — Apr. 98
Cold Metal Shaping — Apr. 106
Valve Stems Switched To Cold Heading — Apr. 122
Large Layout Aid Uses Sine Principle — May 126
Adjustable Travel For Stock Pusher — May 128
Two Axis, Two-Blade Shear Optimizes Stock Utilization — July 104
Simple Gage Replaces Operator's Tape — Sept. 132
Spring Supports Work On Press Brake — Sept. 134
Savings Realized With NC Punch And Plasma Arc Cutter — Oct. 118
15 Walsh Presses Keystone Forge Operation — Nov. 124
NC Turret Punch Press Cuts Production Time — Dec. 110

RESEARCH
What You Should Know About Wear Resistance — Mar. 74
Nontraditional Machining: Where Does It Stand? - Pt. 3 of a 4 Pt. Series — June 109
Rotary Hydraulic Actuators Now Have Cushion Stopping — July 107
Double Tooling Kayos Production Problem — Sept. 126
Interrupted Cuts With Carbide — Oct. 99

SAFETY
Some Tips On Selecting A Press Brake — Jan. 52
Temporary Shields For Die Pins And Bushings — Feb. 100

SCREW & AUTOMATIC MACHINING
Simultaneous Double-Milling Eliminates Two Operations — Jan. 81
Ionic Coolant Doubles Drilling Production — Mar. 103
Right Combination Spells Productivity — May 84
What About Screw Machine Maintenance? — Sept. 110
Carbide Does More Than Increase Speeds On Automatic Screw Machines — Sept. 114
Mix And Match NC And Tracing — Nov. 104
NC Swiss-Type Automatic Saves Setup And Production Time — Dec. 108
Automatic Does Work Of Five Machines — Dec. 111

STAMPING, BLANKING & BENDING
Some Tips On Selecting A Press Brake — Jan. 52
Small Rods Reduce Friction On Die Chute — Jan. 85
Fine-Blanking's Functional Edge — Feb. 74
Savings Realized With NC Punch And Plasma Arc Cutter — Oct. 118
NC Turret Punch Press Cuts Production Time — Dec. 110

TAPPING & THREADING
No Routine Part Runoff — Feb. 94

TESTING
Hardness Testing System Performs 100 Percent Check — May 123

TOOL & DIE DESIGN
Fine-Blanking's Functional Edge — Feb. 74
Temporary Shields For Die Pins And Bushings — Feb. 100

TRACING
Large Molds And Dies Produced Efficiently With Copy Milling — Sept. 128
Mix And Match NC And Tracing — Nov. 104

TRAINING
How To Set A Lathe Compound Angle — Jan. 84
Toolbox Tradition: Holding Fast — Mar. 80
Right Combination Spells Productivity — May 84
Large Layout Aid Uses Sine Principle — May 126
Who Should Become Your NC Programmer? — June 96
What To Expect From NC Training — Sept. 94

TURNING
Finding Your Best Machining Conditions - Pt. 3 of a 3 Pt. Series — Jan. 68
Complex Turning Gets Fast NC Treatment — Jan. 78
How To Set A Lathe Compound Angle — Jan. 84
Two-Turret NC Turning Center Offers Interference-Free Machining — Jan. 90
Fully Automatic Chucker Provides Precision Tolerances — Apr. 125
Right Combination Spells Productivity — May 84
Double Tooling Kayos Production Problem — Sept. 126
Large Chuck Solves Difficult Workholding Problem — Sept. 130
Interrupted Cuts With Carbide — Oct. 99
Non-NC Should Be Programmed Too — Oct. 102
NC User Sets Own Rules — Nov. 96
Mix And Match NC And Tracing — Nov. 104
Savings Realized With NC Precision Lathe — Nov. 126
The Quick-Jaw-Change Chuck...A New Way To Cut NC Downtime — Dec. 94
We Don't Machine Fast Enough — Dec. 102

WELDING
Electron Beam Is Much More Than Welding — Feb. 105
Weldment Over Casting For 25-Ton Flywheel — Mar. 84
Seal It, Bond It, Lock It, Retain It - With Adhesives — Dec. 74
New Company Introduces New Electron Beam Welding Units — Dec. 112
